**Coronavirus:**

**RISK OF INFECTION**

**MAIN SYMPTOMS**
- Fever, chills
- New cough or cough that’s getting worse
- Difficulty breathing, shortness of breath or chest pain

**HOW DOES IT SPREAD?**
- When an infected person talks, coughs or sneezes
- Through saliva or spit and, in certain cases, stools of an infected person
- When you touch a contaminated object with your hands, and then touch your face

**IF YOU HAVE THESE SYMPTOMS:**
- Notify a social worker or a nurse
- Stay away from other people to avoid transmission of the virus
- Do not take public transportation

**HOW CAN I PREVENT TRANSMISSION?**
- Wash your hands often with soap and water for at least 20 seconds
- Stay at least 2 metres away from other people (2 arm-lengths away)
- Tousse et éternue dans le creux de ton coude

**DON’T SHARE PERSONAL ITEMS**
